Project 1

Bank Network Topology

Description

Project Name

Bank Network Design using Cisco Packet Tracer

Objective

To design a secure and efficient bank network that connects different departments, ATMs, a server, and wireless staff using Cisco Packet Tracer.

Devices Used

- 1 Cisco Router
- 2 Cisco Switches
- 1 Server
- 1 Wireless Access Point
- 2 Wireless Laptops
- 5 Desktop PCs

Features

- Router connected to the core switch
- Multiple bank departments connected
- ATM network included
- Dedicated server connected
- Wireless connectivity for staff
- Organized network topology
